-- The MAILING DATE of this communication appears on the cover sheet with the correspondence address --

Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

Art Unit: 3722

1. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

2. Claim 1 is rejected under 35 U.S.C. 102(b) as being anticipated by Simich. Note the indicia on the drill in figure 1 and column 4, lines 27+.

3. The following is a quotation of 35 U.S.C. 103(a) which forms the basis for all obviousness rejections set forth in this Office action:

(a) A patent may not be obtained though the invention is not identically disclosed or described as set forth in section 102 of this title, if the differences between the subject matter sought to be patented and the prior art are such that the subject matter as a whole would have been obvious at the time the invention was made to a person having ordinary skill in the art to which said subject matter pertains. Patentability shall not be negated by the manner in which the invention was made.

4. Claim 2 is rejected under 35 U.S.C. 103(a) as being unpatentable over Simich (3,076,356). It is considered to have been obvious to have placed the indicia on both sides of the drill bit, as this merely constitutes duplication of existing structure which will make it easier to see the marks.

5. Claims 1 and 2 are rejected under 35 U.S.C. 103(a) as being unpatentable over the admitted prior art (APA) of figure 7 in view of Simich. It is considered to have been obvious to have provided the APA with the indicia shown by Simich in order to know the diameter of the hole which has been made. It is considered to have been obvious to have placed the indicia on both sides of the drill bit, as this merely constitutes duplication of existing structure which will make it easier to see the marks.

Art Unit: 3722

6. Claim 3 is rejected under 35 U.S.C. 103(a) as being unpatentable over the APA in view of Simich as applied to claim 1 above, and further in view of Jore (5,854,463). The APA clearly shows the radial hole for a screw which attaches to the stem of the bit 6. The APA lacks a cap on the rear of the handle. Figure 12 of Jore shows that it is common to provide a hole 516 in a handle 514 and cover the hole with a removable cap 526. Note that the handle 514 is also used for rotating a drill bit such as 20. It is considered to have been obvious to have provided the APA with a hole and cap as taught by Jore in order to store parts in the handle.

7. Claims 4 and 5 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

8. Any inquiry concerning the content of this communication from the examiner should be directed to Daniel Howell, whose telephone number is 571-272-4478. The examiner's office hours are typically about 10 am until 6:30 pm, Monday through Friday. The examiner's supervisor, Derris Banks, may be reached at 571-272-4419.

In order to reduce pendency and avoid potential delays, Group 3720 is encouraging FAXing of responses to Office actions directly into the Group at FAX number 703-872-9306. On July 15, 2005, this FAX number will change to 571-273-8300. This practice may be used for filing papers not requiring a fee. It may also be used for filing papers which require a fee by applicants who authorize charges to a USPTO deposit account.
